

AI systems your team can run

A discussion brief for founders
and operations leaders

Manuel Ayala · Founder, AI Vortex

September 2026 · Scope agreed after fit review

When outside systems ownership helps

The work

A recurring workflow is slow, inconsistent or hard to hand over.

The team

AI is already in use.
Review and context still depend on you.

The decision

You need someone to decide what should change and build the path.

A useful starting point: one workflow, an internal owner and willingness to invest.

AI Systems Blueprint

An implementation decision
before committing to a build

From \$2,500

7–10 business days

Published terms. Confirmed after fit and scope.

What the team receives

Current workflow and handoff maps

Recommended architecture

Build, buy, configure or connect decisions

Review, risk and ownership controls

Pilot scope, 90-day roadmap and Loom

AI Systems Pilot

One workflow in controlled use

Typically 3–6 weeks

Scope and price agreed for the workflow

Build, measure and hand over.

Expand only after reviewing the evidence.

Illustrative research workflow

Source → draft → named review → handoff

A missing source holds the item in review.
The reviewer resolves it before handoff.

After the pilot: Embedded AI Systems Partner for ongoing ownership. No public monthly package.

Public work you can inspect

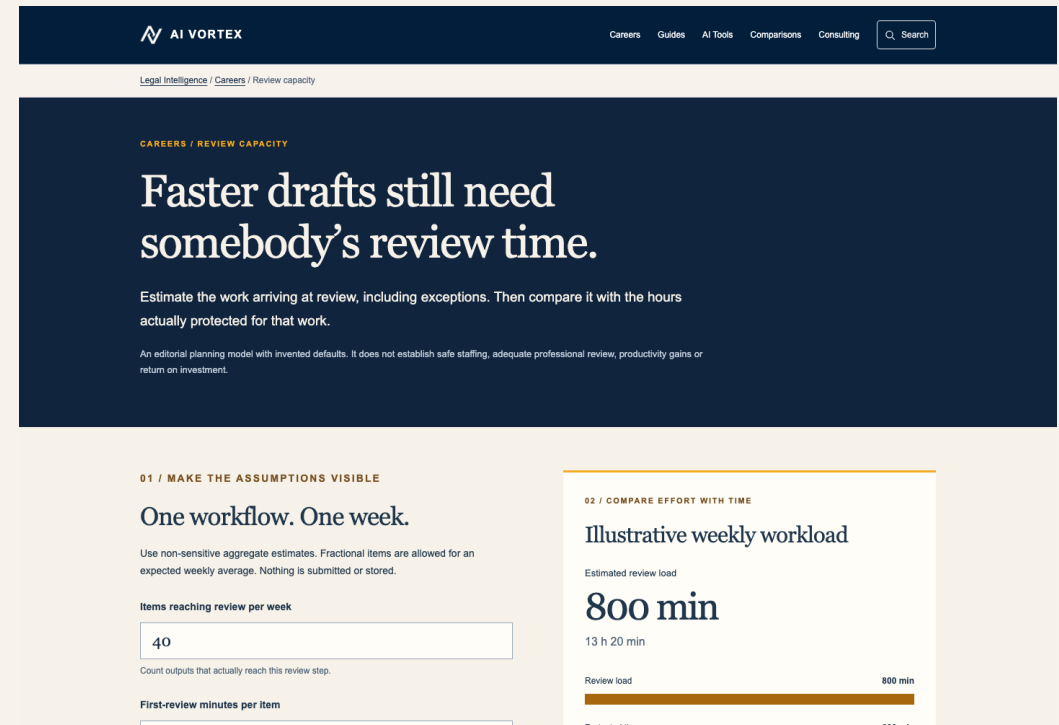

Review capacity

A planning tool that separates incoming work from the time available to review it.

Legal AI Risk Intelligence

Source-linked cases and evidence in a public research interface.

Own public artifacts, not client outcomes or promised savings.

Work directly with Manuel

Founder-led through handoff

I diagnose the operation, recommend the next move and stay accountable through delivery.

What your team brings

An internal owner, operating context and access that can be agreed safely. You do not need a finished AI specification.

Talk directly with Manuel

One workflow is enough to start.

Tell me what gets stuck, who owns it and what needs to change.
A short email is enough. Please leave out confidential files.
